MOP The Government of India has distributed over 10 crore LED bulbs across the country under the Unnat Jyoti by Affordable LEDs for All (UJALA) scheme. The scheme was launched by Hon'ble Prime Minister of India Shri Narendra Modi in January 2015. Efficient domestic lighting is one of the largest contributors to energy savings globally and the distribution of 10 crore LED bulbs in India has led to savings of over 1,298 crore kWh annually. This number has also helped the country avoid capacity of about 2,600 MW. Most importantly, the country has benefitted from reduction of CO2 emission by over 1 crore tonnes annually. The scheme is executed by Energy Efficiency Services Limited (EESL), a joint venture of PSUs under Ministry of Power. On this occasion, Hon'ble Minister for Power, Coal and Renewable Energy, Sh. Piyush Goyal said: "Distribution of 10 crore LED bulbs is not only our achievement, but of that the consumers as well. India has a clear vision to reduce our carbon emissions by 30-35% and energy efficiency is pivotal to achieving this target. Through the UJALA scheme, we have demonstrated our commitment to the country and the world. Taking this commitment forward, we would be procuring 20 crore bulbs this year, leading to more reduction in carbon emission." Under India's commitment to achieving 30-35% reduced carbon emissions, the country has recognised energy efficiency as a key mitigation strategy. Therefore, the government is committed to executing schemes like UJALA.

Tata Power Delhi Distribution has been a pioneer in introducing new Smart Grid Technologies in the Distribution Sector in India and become the first Indian power utility to launch the Automated Demand Response (ADR) Project with Smart Meters in the Delhi. It is one of the first projects in the world where ADR and AMI (Advanced Metering Infrastructure for Smart Meters) are conceptualized together. The project is implemented with participation of selected Industrial and Commercial Consumers of Tata Power Delhi Distribution, having load greater than 300KW, to effectively manage demand during Grid emergency and improve the reliability of power.
